

Personal hygiene

Erisan Mild liquid soap

For the body, hands and hair.

Use	Erisan Mild liquid soap is an unscented, colourless and skin-friendly liquid soap. It is well suited for frequent hand-washing and use when showering, including when washing hair. The product is also suitable for use by those with sensitive skin.	
Properties	An unscented, clear liquid soap which produces a good lather, washes gently and rinses off easily. The combination of conditioning and moisturising components projects the skin's own moisture balance and makes the hair easier to comb. The ingredients are researched and safe. The product has been granted both the Nordic Ecolabel and the Allergy Label.	
Instructions for Use	Apply to wet skin, wash, and then rinse. Dry the skin carefully. Use if necessary a hand rub, basic cream or moisturising cream. When washing hair, wet the hair and the scalp first with sufficiently warm water, then wash the hair, working up a good lather in the process, before rinsing carefully. Repeat the washing process if the scalp/hair is particularly dirty or greasy. Use hair conditioner if needed.	
Note	The dispenser system is a hygienic, sealed dosing system. The dosing pump prevents the entrance of air and microbes into the container. One press of the dispenser provides approx. 1.5 ml of liquid soap.	
Product declaration	Effective ingredient	Effect
	Aqua	Water
	Sodium Laureth Sulfate	Easily rinsable, cleaning anionic surfactant with good lather production.
	Glycerin	A polyol that effectively moisturises the skin and hair and prevents drying.
	Sodium Chloride	Viscosity regulator.
	Cocamidopropyl Betaine	Mild, cleaning amphoteric surfactant which produces a light foam.
	PEG-7 Glyceryl Cocoate	Easily rinsable conditioning agent which conditions the skin and hair.
	Cocamide MEA	Viscosity regulator.
	Sodium Benzoate, Potassium Sorbate	Microbe growth prevention agents.
	Citric Acid	pH regulator

pH 5,5

Storage Storage temperature > +5°C . Shelf life: 3 years from the date of manufacture.

Country of origin Finland

Usage and the environment safety The raw materials are safe for the environment and easily biodegradable. The packaging is recyclable.
