

Personal hygiene

Käsidesi Antiseptic Hand Rub

Professional hand hygiene

Use

For hygienic and surgical hand disinfection. Antiseptic hand rub developed for professional use, suitable for any situations with high hygiene requirements.

Properties

Käsidesi Antiseptic Hand Rub is an effective disinfecting hand rub for normal and sensitive skin. The active biocide is 73.5 % abw (80% abv) ethanol, effectively destroying harmful bacteria and viruses (including norovirus) transmitted by person-to-person contact. The product has the Allergy label awarded by Finnish Allergy and Asthma Federation.

Käsidesi Antiseptic Hand Rub contains several moisturizing and caring ingredients, such as glycerol and glyceryl cocoate derivatives, that effectively moisturize the skin and protect the skin's normal moisture balance. Aloe Vera and betaine soothen, care and protect the skin. The slightly gel like hand rub is specially developed for frequent disinfection of hands

Käsidesi fulfils the EN-requirements of microbicidal efficacy (EN 1500 and EN 12791). Käsidesi Antiseptic Hand Rub is suitable for both hygienic and surgical hand disinfection. According to EN 14476 it also has a broad virucidal efficacy.

Instructions for use

Hygienic hand disinfection:	3-5 ml	30 s
Surgical hand disinfection:	Hands remain moist for 3 min antiseptic scrub.	

Notes

Use biocides safely. Always read the label and product information before use.

Ingredients

Active substance

Ethanol 73.5 w-%, denatured A12
Glycerol
Vegetable oil derivatives

Betaine
Aloe Barbadensis (AloeVera)
Tetrahydroxypropyl ethylenediamine
Acrylates/C10-30 alkyl acrylate
crosspolymer

Use

disinfectant
moisturizes and softens the skin
e.g. PEG-7 glyceryl cocoate, caring and
skin softening oil, prevents moisture from
evaporating
soothes and protects the skin
skin care, soothing and moisturizing effect
neutralizing agent
regulates viscosity

pH	c. 8		
Storage	Storage temperature > +5°C. Shelf life 5 years from the manufacturing date. Use an opened bottle within 6 months.
